

FOI DOF/2025-0207

Request

A breakdown of income generated through domestic and non-domestic rates, broken down by ward within the Derry and Strabane District Council area.

DoF response

I can confirm the department holds the information requested and it is provided in spreadsheet form at Annex B.

Figures have been provided for the 2024/25 rating year, as this is the latest full rating year for which information is available.

Figures include total receipts made against properties within the Derry City and Strabane District Council area during the 2024/25 rating year. Receipts recorded in a rating year may relate to rates raised in earlier rating years.

Please note, mixed properties contain a proportion of both domestic and non-domestic valuation. As we cannot split amounts for mixed properties, these are included in the non-domestic figures.

The Utilities category represents receipts from 'Cumulo' valuations. Cumulo valuations are used to assess the Net Annual Value (NAV) of infrastructure networks located across District Councils (e.g. utilities, telecoms). The Cumulo represents the NAV of the entire undertaking apportioned between relevant District Councils. It is only possible for this to be reported at District Council level.
