ANNEX A

FOI DOF/2026-0647

Request

Under the Freedom of Information Act 2000, or the Environmental Information Regulations 2004 where applicable, please provide recorded information on publicly funded school and education estates construction projects valued over £150,000 excluding VAT, where a construction works contract, project call-off or qualifying works order was awarded between 14 October 2024 and 14 October 2026 inclusive.

Include new builds, extensions, refurbishments, upgrades and standalone mechanical or electrical installation works. Please include awards through Dynamic Shortlisting Systems, frameworks, term contracts and direct awards, whether or not a project-specific PQQ was issued.

For each qualifying project/award, please provide, where held:

1. Project name, site/location and project or contract reference.
2. Date of the construction contract award, project call-off or works order.
3. Recorded total construction project value and awarded works contract value, where available, stating the VAT basis.
4. Name of the appointed main/building contractor, or direct works contractor where there is no separate main contractor.
5. Name of the mechanical contractor/subcontractor recorded as appointed or approved for the awarded works.
6. Name of the electrical contractor/subcontractor recorded as appointed or approved for the awarded works.
7. Procurement route and any published award reference/link.
8. Name of the electrical and mechanical consultant.

The £150,000 threshold applies to the recorded whole construction project value, not to the individual mechanical or electrical subcontract package. Where no total project value is recorded, please use the awarded works contract or call-off value. I am not asking you to reconstruct a project value that you do not hold.

For mechanical and electrical firms, please distinguish names recorded as approved/appointed from firms merely proposed in a bid. Where a recorded replacement has been approved, please identify it. If a name is not held, please state that for the relevant project and provide the other information held.

An existing register/export in Excel or CSV would be preferred; existing records are acceptable if no consolidated list is held. If the request would exceed the applicable cost limit, please advise how it can be narrowed. My priority is the

existing awards register identifying projects and appointed main/direct contractors with electrical and mechanical subcontractors identified.

Please redact my name and email address from any publicly published version of the request or response.

DoF response

I can confirm the department has carried out a search of its records and collated the information requested.

For ease it has been presented in a table in **Annex B**
