Request

I wonder if you can help me please. I'm looking into energy efficiency ratings of homes in the UK, and wanted to find the NI equivalent of this data on England and Wales. Specifically I'm looking for comparable data from 2021 along these lines, which says what percentage of homes fall within each band. (Table provided by you shows data broken into Existing dwellings and New dwellings). Is this something you can help with please?

Response

I can confirm the department holds the information requested. The data can be found in the table below:
