

## TEMPLATE FOR APPLYING FOI SECTION 40(2)

DOF/2022-0329

### The lawfulness, fairness and transparency test

Business areas are required to carry out a “lawfulness, fairness and transparency test” when considering the disclosure of third party personal data falling within the scope of a FOI or EIR request. **In most cases**, neither of the lawful basis outlined below will apply, however the business area must complete the test as evidence as having considered.

The steps are as follows:-

#### 1. Consider the Personal Data falling within the scope of the request

ICO guidance states that, personal data only includes information relating to natural persons who:

- can be identified or who are identifiable, directly from the information in question; or
- who can be indirectly identified from that information in combination with other information.

The request is for:

4. *Was any reason received for the non attendance of interviews?*

#### Brief description:

The data held is personal, third party data but does not constitute special category data.

#### 2. Lawfulness

Do either of the two lawful basis below which allow for the disclosure of personal data apply? **No**

- Consent:** We do not have the consent of the candidates to share their reasons given for non-attendance at interview. Information provided as part of their responses would contain their personal information.
- Legitimate interests:** Disclosure is not necessary for the Department’s legitimate interests or the legitimate interests of a third party that overrides the data subject(s) rights and freedoms, particularly their right to privacy. The data subjects involved would have a reasonable expectation that this information would not be shared with the public at large.

The DoF Privacy notice states that we may process personal information for the purposes of detection and investigation of suspected or actual fraud, loss or

crime, data matching under the National Fraud Initiative, staff monitoring and as required by other legislation. This request is based solely on the requester's private concerns as opposed to a pressing public interest that would necessitate transparency and disclosure of the information.

Consequently, if NICSHR was to comply with the request, it would, in effect, be making an unrestricted disclosure of personal data to the general public on the strength of the requester's private interests. This could constitute a disproportionate and unwarranted level of interference with the individuals' rights and freedoms – particularly their right to privacy and family life under the Human Rights Act 1998.
